

13. Print Number in Large Format

Condition:

Write a program that receives a number and prints it in a large size, as shown below.

Input:

- On the first line, enter the number that should be printed in large size.

Output:

- The large numbers are displayed on a new line.

Examples:

Input	Output
12	<pre># ##### ## # # # # ##### # # # # ##### #####</pre>
