

05. Find Maximum in List

Condition:

Write a program that accepts a list of numbers and returns the largest number in the list.

Input:

- A list of numbers is entered on one line, separated from each other by commas.

Output:

- The largest number in the list.

Limitations:

The list contains at least one number.

Examples:

Input	Output
1, 2, 3, 4, 5	5
-5, -3, -1, -7	-1
100, 200, 300	300
