

## 06. Find the Missing Number in a Sequence

### Condition:

Write a program that accepts a list of unique integers arranged in ascending order, with one number missing, and returns the missing number.

### Input:

- A list of unique integers in ascending order.

### Output:

- The missing number.

### Examples:

Input	Output
1, 2, 4, 5	3
12, 13, 14, 16	15
32, 33, 34, 35, 37, 38	36
