

## 04. Vowel Count

### Condition:

Write a program that takes a string and returns the number of vowels in the string. The vowels are 'a', 'e', 'i', 'o', 'u' and their capital letters.

### Input:

- A string.

### Output:

- An integer representing the number of vowels in the string.

### Limitations:

The string can contain letters, numbers, and other symbols.

### Examples:

Input	Output
"Hello World"	3
"Python"	1
"AEIOU"	5
"bcdfgh"	0
