02. Sum of List

Condition:

Write a program that accepts a list of numbers and returns their sum.

Input:

- A list of numbers.

Output:

- The sum of the numbers in the list.

Limitations:

The list can contain positive and negative numbers, as well as zeros.

Examples:

Input	Output
1 2 3 4	10
10 -1 7	16
0 0 0 0	0
-2 -3 5	0
