12 . Calculate Perimeter of Rectangle

Condition:

Write a program that takes the length and width of a rectangle and returns its perimeter.

Input:

- Two numbers: the length and width of the rectangle.

Output:

- A number representing the perimeter of the rectangle.

Formula:

Perimeter = 2 * (length + width)

Examples:

Input	Output
5 3	16
7 2	1 8
10 10	40
